

About HRN & the Role

HRN has recently been appointed the CASE Construction Equipment dealer for the whole of Scotland, creating an exciting opportunity within our growing Construction Division.

We are now recruiting a Service Technician (Construction Mechanic) to be based at our Inch depot, with responsibility for the servicing, maintenance, and repair of CASE heavy line machinery. This role is a mix of workshop- and field-based work, supporting our customers by ensuring their equipment operates safely, reliably, and at peak performance.

Key Responsibilities

- Diagnose, service, and repair CASE construction machinery
- Carry out on-site servicing and breakdown repairs as required
- Complete pre-delivery inspections (PDIs) and machine set-ups
- Accurately complete job cards, timesheets, risk assessments, and related documentation
- Maintain a clean, safe, and organised workshop environment
- Support and mentor apprentices and colleagues within the service team
- Follow all health and safety procedures at all times
- Participate in ongoing training and development

What We're Looking For

- Minimum 1 years' experience in a mechanical or service technician role (construction preferred)
- Strong knowledge of mechanical, electrical, and hydraulic systems
- Experience using diagnostic software and technical manuals
- Computer literate and confident using diagnostic tools
- Full UK driving licence essential (forklift or HGV licence advantageous)
- Good communication skills with a customer-focused approach
- Flexible with working hours, including occasional overtime and weekends
- LTA / NVQ qualification (or equivalent) desirable
